

River Cree Slot Machine Money Tunnel

We are very pleased with our new Slot Machine Windtunnel. Operationally the components and workmanship created a top notch product. The attention to detail on the aerodynamics works very well. I think the details on using Velcro, having an escape handle and the floor angling to help with the wind tornado effect are excellent. I have used other similar products and I am very pleased with how this windtunnel looks and works. It can be easily moved and set up and also creates an impressive visual.

The initial feedback from staff from the slot attendants to the Director level has been great. Everyone thinks it is an exciting element to our promotional programming. Even my own assistant managers in marketing had not expected it to be so great looking and working.

The guests also love it, everyone wants to get in and give it a try.

Your team designed and crafted an exceptional product, especially considering the extremely short notice and tight timelines. It was very easy to work with you and your company and we look forward to continued business and future exciting products.

Your product was the feature element to our current promotion "April Showers of Cash". On our first day of this promotion we had a 25% increase in admission attendance of our loyalty card holder compared to the same day the week before (we had between 13-15% increase compared to 2 and 3 weeks before.)

Signed - a satisfied customer.
